```
use transformrs::chat;
use transformrs::Message;
use transformrs::Provider;

#[tokio::main]
async fn main() {
    // ...
    let resp = chat::chat_completion(&provider, &key, model,
&messages)
        .await
        .unwrap()
        .structured()
        .unwrap();
```

```
println!("{}", resp.choices[0].message.content);  
}
```
